Power LED

DC Power Port

► Checking the LED Status

Power LED	Description
Green LED	Power On
LED Off	Power Off
Battery Charging Status LED	Description
Solid Red Light	Battery Is Being Charged
Solid Green Light	Battery Fully Charged
LED Off	No Battery Detection Occurs

► How to Charge the Battery

Place the battery into the charger (with the model name and battery strap facing left), and the charger will detect the presence of batteries and initiate charging (LED-red light). If no detection occurs, no light will be displayed.

► Charging the EA660 Battery

We highly recommend using the adapter provided in the EA660 4-Slot Battery Charger package.

WARNING!

There is a risk of fire and burns if the cradle is used improperly.

DO NOT disassemble, crush, puncture, short external contacts, or dispose the cradle in fire or water.

CAUTION!

To ensure the unit working properly, please keep all connectors away from the contaminants such as dust, grease, mud, and water. Negligence may cause the unit to lose communication, short circuit, or overheated. If the connector is damaged, please ensure the connector is fully repaired before using the unit to avoid short circuiting.

DO charge between 20% and 80% to protect your battery.

Avoid full discharges (<0%) or charging all the time (always 100%) to reduce stress on the battery.
